Jigsaw Blades

Blade Material Types

Bi-M (Bi-Metal)
Combining the flexibility of a HCS body with a HSS hardened cutting edge, resulting in a tough, shatter resistant blade. Longer service life leads to greater cost effectiveness per blade.

HCS (High Carbon Steel)
High Carbon Steel Blades for use with softer materials, such as hard and soft wood, plastics and laminated boards.

HSS (High Speed Steel)
Hardened steel designed to cut hard materials such as mild steel, aluminium and other non-ferrous metals.

Cut Types

Straight
Standard blade type, comes in a variety of teeth types and blade lengths. Perfect for all general purpose applications.

Down
Reversed teeth to cut on the down-stroke. This prevents the splintering of decorative surfaces such as kitchen worktops.

Curve
These blades have a reduced blade depth to allow them to perform curved cuts.

Precision
These blades are made from a thicker plate to help achieve a 90° cut. It also makes this blade ideal for hardwood.

Teeth Types

- **MSS - Milled & Side Set**
  Rough/Coarse Cut
  Basic tooth pattern used on the entry level blades. A quick but fairly rough cut.
- **MWS - Milled & Wavy Set**
  Fine/Medium Cut
  This pattern is used to give a fine, straight cut.
- **SSS - Side Set & Sharpened**
  Fast/Medium Cut
  This configuration gives a fast, medium cut.
- **GTG - Ground/Taper Ground**
  Clean/Quick Cut
  These top quality blades give a clean, quick cut in both wood and plastic.

Bi-Metal Blades

LONGER SERVICE LIFE!
